

<b>S/N</b>	<b>Key Commitments</b>	<b>Action taken in 2010 - 2011</b>	<b>Proposed action for 2012 - 2013</b>	<b>Observations and Recommendations</b>
<b>I</b>	<b>Sensitization, Awareness Raising and Education</b>	Sermons based on care and preservation of the environment and issues of climate change in June 2010 and June 2011 in all 1452 PCC Congregations	To Organize a week in June in PCC for reflection on the care and preservation of the environment. Sermons based on a common text to be preached on a common Sunday	The PCC hierarchy has already endorsed this and started this in 2010
		Formation and strengthening of Green Clubs in PCC secondary schools. Activities and public march organized	To Organize a training workshop for all Green Clubs in PCC schools and help develop their action plans	This activity is greatly dependent on availability of funding
		Development and implementation of curricula on environmental education in 140 PCC primary schools	To follow up and monitor the teaching methods adopted in teaching of environmental education	Continuous seminars with Teachers on the teaching of this subject is necessary
		Protection of water catchments in 3 communities in the NW region of Cameroon	To identify and protect the water catchments in at least 5 new communities with water crisis	This activity has a high impact in communities but funding is necessary
		Promotion of Agro forestry in 14 communities in the PCC agricultural extension and training project	To identify and promote agro forestry in at least 10 new communities	The Presbyterian Rural Training Centre Fonta is already working on this.
		Publication of articles on environment and climate change in the Christian Men and Christian Women	To publish new articles on different aspects of the environment	To collaborate with the Departments of Men's and Women's work of the PCC. The study

<sup>1</sup> Presbyterian Church Cameroon 4<sup>th</sup> Jan 2012

		Fellowship study file for its 16,784 and 46,193 members respectively.		file is produced annually. <sup>2</sup>
		Publication of articles on environment and climate change in the official Newsletter of the PCC, The Messenger which is sold to the public	To publish efforts of the PCC in the implementation of its environment and climate change 7 years plans	This will support our sensitization efforts on issues about the care and preservation of the environment
<b>II</b>	<b>Community Forest Development and Tree Planting programme</b>	Planted 100,000 trees in the arid northern regions of Cameroon	To plant at least 300,000 trees in different regions in Cameroon threatened by environmental degradation	We anticipate grants in this direction and may plant more trees if the grant is available
		Extension of the community Forest in the Mission Hill of the PCC Synod Office as well as the training of local Conservation facilitators	Plant at least 1000 new trees in the Mission Hill	The PCC Development department will facilitate this process
		Signed Memorandum of understanding with 2 communities in the north western region of Cameroon to develop community forests in these communities	To map out and create community forests in these 2 identified communities	Community interest is high but will need support in this direction
		Signed Memorandum of Understanding with the National Forest Development Agency and worked together in the extension of the forest	To engage the National Forest Development Agency in the creation of community forests	This governmental agency is willing to provide technical support and training but financial support is

		in the PCC Mission Hill		needed
<b>III</b>	<b>Energy Conservation</b>	Promote the use of energy efficient bulbs in PCC schools, health facilities and Congregations	To monitor and ensure the use of energy efficient options in PCC institutions and Congregations	This initiative is gaining grounds and is also economical to these institutions
		Developed plans on solar panel use in rural Congregations and communities	To apply for a seconded staff from abroad to work with our local staff in the PCC Technical Services	Capacity building in the area of solar panel development is required for our staff
		Promoted and facilitated the purchase of fuel efficient cookers in 10 PCC boarding schools	To facilitate the purchase of fuel efficient cookers in other PCC boarding facilities	This contributes to a reduction in the use of fuel wood and thereby reduce tree felling
<b>IV</b>	<b>Waste and Waste Management</b>	Introduced the use of two separate waste bins in 19 PCC secondary schools for the disposal of organic and inorganic waste.	To support Green Clubs in PCC secondary schools to monitor and help the school administration in the proper use of separate bins	Helps develop a culture of proper waste disposal amongst the youth
		Sensitized and facilitated the proper and efficient disposal of used engine oil and other industrial waste by the PCC technical garage, Presbyterian Technical Services (PresTech.)	To monitor and encourage proper waste disposal and to organize a training on the effects of dangerous waste to the environment	Technicians are exposed to a lot of danger in their work daily. Training will help but support is needed
		Facilitated the construction of 2 modern incinerators in 2 PCC general hospitals (smoke free incinerators that	To facilitate the construction of at least 3 modern incinerators in some identified Health facilities by the	We need financial support to realize this plan

		burns needles to dust) by the Prespot.	Presbyterian Pottery Project (Prespot).	
		Sensitization of PCC health facilities on the proper disposal of expired medicines in collaboration with the government Pharmaceutical Agencies	To monitor use of medicines in PCC health facilities and to retrieve all expired medicines to the Central Pharmacy for proper disposal	To work in close collaboration with the Central Pharmacist of the PCC.
<b>V</b>	<b>Media and Advocacy</b>	Created a working group on climate change and the care and preservation of the environment in the Presbyterian Theological Seminary	To meet quarterly to review the PCC 7 year environment plan and to share experience as well as develop articles for publication in the Seminary Publication “Voices from Kumba”	Members of the working group are enthusiastic and willing to supervise student Pastors working on the environment but support is strongly recommended to facilitate the work of this group
		Organized a radio call in programme on climate change and the need to protect the environment	To develop radio programmes on the environment and climate change	To work in close collaboration with the PCC Communication Secretary
		Organized a seminar for <sup>3</sup> media practitioners in the SW region on information sharing, responsible reporting about the	To organize to workshops with Media practitioners on issues about the environment	This is a strategy to enhance public knowledge about issues of the environment and
